User Guide i4M Machine Update

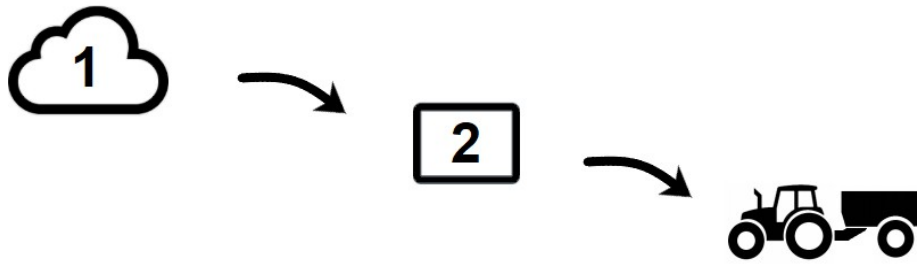

Version 301

Foreward

This is a basic guide for i4M Machine Controller updates only. This guide provides supplementary information only. Please see other relevant documents for Machine Operation.

Contents	Page
Overview	03
Getting Started	03
Downloading Updates	03
Updating the Machine	04

Overview – Two Easy Steps

- 1 - Download the updates from the cloud (you need internet)
- 2 - Connect the tablet to the Machine Wifi and send the updates (don't need internet)

Notes and Features

- The Machine Updater App is for essential updates or repairs only
- Some machine devices cannot be updated
- You can download the update files anytime, and send them to the machine later on
- You can update multiple machines, using the same update
- The update files stay on the tablet until delete them
- You can update the machine to newer versions or backdate it to older versions of software

Getting Started

- First check if your device can be updated – using the Updater App
- Connect to the Machine Wifi
- Open the Updater App, tap the menus below

Tap to confirm Wifi is connected

Tap to check the device can receive updates

Downloading Updates

- Connect the tablet Wifi to an internet connection, tap the menus below

Tap the update that you want to download

Updating the Machine

- Do not turn off the machine or interrupt the tablet during the update
- Connect the tablet to the Machine Wifi hotspot
- The machine device will reboot, tap 'Check Wifi is Connected', turn Wifi OFF then back ON (force it to connect)
